Established 1875

BRIDGEPORT, INDIANA

OWING to the unusual demand for catalogs, our supply has been exhausted and we have had to prepare quickly this brief descriptive price list to care for the demand until we can have our complete catalog reprinted. This condensed form appears with a complete list and prices, but is abbreviated as to description as well as illustration.

The Policies Which Guide Our Business

DURING these years among the trees and fruits we have gathered much valuable information that is especially valuable to the beginner; this information is for the asking to our patrons. We are glad to assist you in any way we can.

We keep our methods of propagation and cultivation up to date, using only those methods that produce the best results; and with our thoroughly drained and fertilized soils we are able to produce as vigorous, well matured and healthy stock as can be found anywhere.

Our stock is not only well grown, but carefully dug, handled and packed. We take every possible care to have varieties true to name, as we fully realize the importance of this to the planter. We do not claim infallibility, but take every precaution to reduce mistakes to the minimum. No tree or plant ever goes out of our hands knowingly mislabeled.

It has been our purpose to deal honestly and fairly with our customers. This is not only right, but our experience has proven it to be good policy, as our business has steadily grown until our trade now extends over the entire country. We are doing business with many people that we did business with a quarter of a century ago.

It is not our object to grow or offer cheap stock, such as is often palmed off on the public. Within the last few years the cost of production has increased rapidly and in many cases it has fully doubled. The market price of stock in many instances is equalled by the cost of production, owing to the rapid advance in the price of labor and materials; therefore, when quality of products is considered, our prices will be found as low as those of any first-class nursery.

Guaranties

In growing and furnishing all nursery stock, we use the greatest care to have it true to name, and will replace any that may prove untrue, free of charge, or refund purchase price. We shall not be liable for more than the purchase price. Every purchase from us is made on these terms.

GUARANTEE AND CLAIMS. All goods are guaranteed true to name, up to grade, full count, and in good condition when delivered. Claims must be made within five days after delivery to customer's delivery point to receive consideration.

We do not guarantee stock to grow, or results in any way. There are so many causes for failure over which we have no control that we can assume no responsibility after stock is delivered in good order. Poor soil, unfavorable weather, ignorant or careless culture—all contribute to failure and all are beyond our control.
